INTERESTING MEETING HELD BY BOARD OF TRADE

Improvement of Roads One of the Principal Topics Up for Discussion.
Meeting Addressed by Mr. S. T. St. John, General Manager, and Mr. W. C. R. Lett, Colonization Agent, of the Transcontinental Townsite Co.

A special meeting of the Mirror Board of Trade was held at Duitman & Johnson's hardware store on Thursday, when the highways leading to Mirror were up for discussion. It was decided to petition the Government for an appropriation to open up new roads, and to improve the roads now in use, so as to give the farmers the best opportunities in the country to trade in Mirror. Committees and delegates were appointed to look after the petitions and the matter will be proceeded with at once.

The telephone question was discussed at some length and Mr. S. T. St. John agreed to interview the Superintendent of telephones at Edmonton about placing a central at Mirror.

President Flewelling then called on Mr. St. John, of the Townsite Co. who in his address to the members pointed out that Mirror, with the exception of all public institutions, in this district would be the best town in Central Alberta.

An agricultural district there was none better to be found anywhere, and that the Development Co. have improved the fact on the farmers in the East and the States, who have become interested here through the splendid publicity campaign which they have carried on for Mirror. It is expected that very shortly all the land adjacent will be raising more cattle and dairy products, and the plow will turn what soil remains. This in itself, would be enough for most towns, but the Railway Co. are also working for the town. A six-and-a-half-mile long farm table, eight miles of side tracks, all completed, and with the additions to be made this summer, will ultimately make this a divisional point second to none in Alberta. Like the members, he felt that the railway running north and south would not be the only line running in here, but that railroads tapping the western coal fields at Brazeau would probably run through Mirror to the East. Anybody studying the map would arrive at this conclusion, and a railroad town had never yet been known to be other than the first and best, finally growing into a city for that particular district. Industries, the town is young yet. The country was there first, then the people; they had both of the right kind; then the railway, now they are partners working together. Both the Development Co. and the Board of Trade have had inquiries re-

garding the clay deposits here for the manufacture of brick, sand for concrete; our dairy products are known as the best, and a condensed milk factory should not be out of our experience shortly. Buffalo Lake, with an abundance of the finest of fish was known all over the Prairies Provinces, and the sand there was particularly fine for the manufacture of the best of glass. These are only a few of the already proven commodities, and it is up to those interested in town, to endeavor to develop these industries, and others would follow. It was over six months since he had last seen the town, and it was pleasing to note the way it which the town was being built, not like a village, but in a broad way with substantial buildings, and he assured the Board that the Company had a number of business men coming into town this spring, some of whom were anxious to be here now. In

the fall of last year he had the opportunity to go to the Board, and to find so large a body alive to the possibilities of the town, taking care of telephones, road allowances and local improvements, and a partner with the Railway and Development Companies.

Mr. Lett on being asked to address the meeting said that there was not much left for him to say. As Roma was not built in a day, neither would Mirror, and while the town looked good to him, he claimed that he knew of many more buildings that would be started in a month or two. His business was the colonization which he stated was the foundation for all town and that while we had the best class of farmer here today, the Company wanted more of them and they would have them in here until there was no idle land in the district. They would also take care of the farmer after he got here, and see that he had proper facilities for shipping his stock and products. Large capacity elevators will be completed in Mirror this summer. Previous to his acquaintance with Mirror and district, he had been interested in Edison, and there were few people who hadn't heard about the phenomenal advance of real estate there, and he thought that Mirror had even a brighter prospect, having a far better farming country to draw from, besides other advantages. He found the business men as optimistic, energetic and aggressive in Mirror, as any he had met elsewhere, and thought the success of the town was assured.

AROUND TOWN AND DISTRICT

W. D. Cook was a visitor in Edmonton for a day or so this week.

Ed. Coleman left this (Thursday) morning on a business trip to Provost for a few days. Clyde Pitman is looking after the pool and business during Ed's absence.

Mah Bing has installed a new Teletype computing scale.

D. Clemis, of Lethbridge, and A. Mather, of Alix, were callers in Mirror on Tuesday.

M. J. McCaul of the Board of Railway Commissioners, was in town on Wednesday evening and had a satisfactory interview with the officers of the Board of Trade in regard to stock yards, side tracks, and several other details.

Don't fail to attend the hockey match on Mirror rink next Saturday afternoon at 3 o'clock. Bashaw and Mirror teams will battle for supremacy.

It is said that there are a great many boggus \$10 bills about. The editor deplores the fact, but would be much more concerned personally if they were \$1 bills.

Mirror hockey team will go to Alix middle of next week for a return game. A crowd of rooters will accompany the boys.

Board of Trade meeting next Tuesday evening at C. E. Bent's house. All members should be in attendance.

The Merry Mirror Minstrels are putting in some good practices and the coming show promises to be a winner.

Jas. Steers was sick for a few days this week.

Read the Lamerton Mercantile Co's ad. The prize winners in the competition are announced.

E. E. Johnson was in Edmonton on Monday.

From all appearances, the prediction made at the opening of the winter season to the effect that the winter would be a mild one, is being borne out with the weather experienced during the past month or two. The conditions are so decidedly different to those of a year ago that they present a cause for general satisfaction.

WOODMAN MASQUERADE

The masquerade dance given by the Woodmen's lodge in Johnson's pool room, Mirror, on Wednesday evening, proved to be one of the most enjoyable functions held this winter. A large crowd from Lamerton, Alix, Nevis, Content, South Buffalo Lake and Mirror attended. The costumes were many and varied, and represented all nationalities, colors and shades, English, Scotch, Irish, German, Spanish, Dutch, American and many others, who intermingled in a happy and joyous manner and danced until the two small hours of the morning. The Woodmen orchestra supplied the music.

BUFFALO LAKE NEWS

G. J. Estell made a trip to Mirror on Wednesday.

Mrs. Alice Barton, of Lidgerwood, N. D., arrived on Saturday.

G. E. Darland and family,

MIRROR BEACH, A NEW SUMMER RESORT FOR ALBERTA

Preparations Now Under Way for Beautifying the Beach and Park. Golf Links, Shooting Traps, Club, Boat and Bathing Houses to be Erected Shortly

The members of the Mirror Board of Trade had an opportunity this week of looking over an outline map of the new summer resort to be located at Buffalo Lake.

S. T. St. John, general manager and secretary of the Transcontinental Townsite Co., and R. C. W. Lett, Colonization Agent, were in town today, (Thursday) in connection with this proposition, and also taking views of scenery around Mirror Beach. The survey of lots is partly completed and the plots will be put on the market in a few months, and in the meantime, the work of laying out the drives, golf links, etc., will be proceeded with. Mr. St. John states they have already received a considerable number of enquiries regarding the new resort, and quite a few have even gone so far as to ask for reservations.

The plans of Mirror Beach call for an hotel to be erected on the highest elevation overlooking the lake, which is twenty-five feet above the shore-line. From this point the ground falls away to the water's edge, and an open park in front of the hotel will be used to beautify the natural surroundings of the resort. Tennis and croquet courts for the enjoyment of summer visitors will be situated in the park. The cottages will be built in the form of a crescent facing the lake, and ample space will be left between each house for people in the rear to have free

access to the lake. Boat and bath houses will be erected on the beach, and two docks, one for row boats and canoes, and the other for larger craft. The golf links containing 60 acres, will be the finest in the country. The club house will be built about three-quarters of a mile from the hotel. Over 14 miles of driveways are surveyed, the road winding in and out over the whole countryside. A special feature of this drive is that all the roads are on a curve, no part of the road running in a straight line. Shooting ranges will also occupy a portion of the grounds.

The company intend putting a large gasoline launch on the lake, which will only be one of

many owned and operated by other parties. There is a straight water course of over

22 miles on the lake, varying in width from 75 feet to 6 miles, and it is quite probable that a

regatta will be one of the drawing cards in the program during the holiday season at Mirror Beach.

A large amount of money will be expended in improving and developing the country around the Beach, and Mirror Beach proper, one of the finest summer resorts in the West. Situated in the centre of Alberta, the resort will draw its quota of pleasure seekers from every direction. The bulk of the traffic, will of necessity pass through Mirror, and it is a foregone conclusion that this town will reap a huge benefit, as soon as the Beach is in running order.

ESTRAY

On the promise of L.S. Olsen, sec. 14, r. 22, twp. 40, since Nov. 1910, one large dehorned steer, 4 or 5 years old. Black with flanks; tail white; white underneath, on both jaws and face. Notch from right ear. Branded U T on right hip, and H H on right shoulder. Branded on this 2nd day of February, 1912.

N. A. DONALDSON,
Brand Reader.

ESTRAY

The undersigned gives notice that he has captured a Bull, coming one year old. Spotted red and white; some white on face; no marks or brands, while running at large contrary to the provisions of The Entire Animals Ordinance. The said bull is detained on SW 1/4, 40-22, W4, and if not claimed in due course will be dealt with according to law. The capture was made at 3 o'clock on the 2nd day of Feb., 1912.

W. G. MERKLEY,
16-3 Mirror P. O.

For Sale

A few Head of Well-broken Horses, in good condition: One Tent 16 ft. x 24 ft.; also quantity of Farm Machinery.

Apply to—
W. L. CROOKS,
Alix
A. L. CROOKS,
Mirror, Alta.

14-4

Seed Grain for Sale

200 bushels of Banner Oats, at 50c. per bus.; 300 bushels of Invincible Barley, at 50c. per bushel; 100 bushels of Red Claff Wheat, at \$1.00 per bushel; 20 bushels of Timothy Seed, at \$2.50 per bushel. Seed is all clean and in A 1 condition.

Apply to PHILIP NEIS,
14-1 Lamerton P. O., Alta.

Warning!

Will the party who removed the lumber and building material from the Methodist Church, Mirror, return same at once and save further trouble. By order of the Church Board.

S. G. DUNHAM,
Chairman.

Rye Grass Seed For Sale

I have a limited quantity of Western Rye Grass Seed for sale, price \$1.50 per bushel.

Apply to GEO. E. PITTERSON,
15-3 Lamerton P. O.

For Sale

100-Egg Incubator and Brooder, Sypher's make. All in good order.

Apply to MISS EDWARDS,
Alix P. O.
or E. GOATER,
Mirror P. O.

The Edison Phonograph

WE have Secured the Agency for the above Phonograph, and have a good selection of Amherst Records, at 60c.; and Standard Records at 40c. Call in and get the Latest Selections.

MEN WHO DON'T EXERCISE

SUFFER FROM INDOORISM,
HEADACHES, POOR APPÉ-
TITE, SLEEPLESSNESS

Nothing so Sure to "Set Up" a Man,
Make Him Feel Bright and Vigor-
ous, as Carter's LIVER PILLS

Lack of exercise will overwork every
one, causes that continue to work a kill
Samuel S. Stephens, Jr., one of the best
known citizens in Woonsocket.

In his convincing letter Mr. Stephens
says:

"A year ago I returned home after a
long trip, completely worn out. I was

so much overcome by constant headache,
dizziness, that I despaired of ever getting
out of bed again. My languor, had no energy and spirit, found it difficult to sleep for more than five hours.
I ate next to nothing, and in consequence lost weight and strength. I was pale all the time, and my eyes that made me look like a shadow."

"It was a blessing that I used Dr. Hamilton's Pills."

Like a new man. The feeling of weight
and languor in my stomach disappeared,

My head, still, best of all, began to enjoy
my meals. The dizziness, languor and faintness were gone.

I fasted regularly by old-time vigor and spirit.

Today as well—thanks to Dr. Hamilton's Pills.

For health, strength, comfort and good looks, nothing can compare with Dr. Hamilton's Pills. Beware of substitutes, and don't let any doctor palm you off with pills which can make more money in 25¢ a box, five boxes for \$1.00, by mail from The Cataraqui Company, Kingston, Ont.

UP FROM THE RANCHO

Dr. Luther H. Gulick, director of the department of hygiene at the Sage Foundation, with its fund of \$10,000,000, on the west coast, has been at Oberlin College to lay out lawns, care for house furniture, and workers as a body against the Mexican bandits. At the high school at Hanover, New Hampshire, he paid his living expenses by caring for the horses and mules while he summered there. He studied at the medical school at New York, taught physical training and first aid to the men who worked for him, and was able to get before they made delivery to his customers. Dr. Gulick was born in Honolulu, spent his childhood in Japan, learned the Japanese language thoroughly. In his younger days he intended to follow his father's footsteps and become a medical missionary.

New German Government—So much for great gurus. And vat also is name of the great guru always coupled in our minds was Schiller? Hegel—Charybdis?

When Your Eyes Need Care

Try Marine Eye Remedy. No smearing. Peel Film. Smoother. Non-greasy. Water Eyes and Granulated Eyes. Film transparent. For your children. Marine Eye Remedy is compounded by our established "Patent Medicine" Company. It is the best eye medicine ever made and sold for babies in the East and West. See Dr. Philip of Canada, 100 King Street, Toronto, Ontario, Canada.

Murine Eye Remedy Co., Chicago

DON'T LET THAT COUGH

ROB YOU OF SLEEP

You probably know all too well how it goes. Just as you close off, the tickle in your throat begins and coughs, still louder. A harder cough, and then another. First you know, you're wide awake, coughing your head off.

A few nights in, and that's all you need to do. You're wide awake, and the cough takes a tight grip on you.

But why endure? The National Drug & Chemical Co. of Linedex, Licorice and Chlorodyne will soothe that expectorating tickling, those fits of coughing, those spasms of the mucous membrane. It not only stops the cough quickly, but it relieves the pain of freshening sleep, yet it goes to the root of the trouble and drives out the cold causing it. It is the only cough medicine Dr. Co. of Syrup of Linedex, Licorice and Chlorodyne, because it tastes so good. You'll be surprised at how well it works. It for you in 25c. and 50c. bottles. The National Drug & Chemical Co. of Canada, Montreal

WHAT WILL THE POOR HORSE DO?

In the modern horse to be super-sophisticated and refined is a very pertinent one, and is worthy of some consideration by breeders and connoisseurs of the equine tribe. As a process of evolution, due to changes of environment and different breeding, and cross-breeding—breeding, diversified types of the family Equidae, each of these many types is well suited to its special features of the many complicated and intricate workings necessary for the most rapid attainment of human endeavor. Yet, with all his talents, still, and his much less animal beauty, which have been developed through ages of careful breeding and management, I hear it whispered that man's invention has brought woe from "our faithful friend" his selected portion in the pleasure and power of the horse.

The poor horse, whether he is pedigree or sulky, is as popular as ever. As, etc., Newmarket, the Woodbine and the like, are the chief centers of the crowds each year. This proves that, for sport, as well as pleasure, the horse remains a favorite. Aeroplane, trams and auto cars draw large crowds, but they are not depicting the real horse.

The poor horse, the dizziness, languor and faintness, are still with us. The fast, fast, fast, is the rule.

The evolution of the modern horse, the development of the pony, has reached its goal. It is a matter of record that the Chinese race horse was first used in the days of war and chivalry. With these, the Chinese, the Japanese and the like, and Asia were the first to adopt these horses for these purposes, and a division of breeds spread with it, and gradually increased its usefulness.

Even the diminutive pony has its place. He is the pet of the family, and the companion of the child. He may be safely handled as a means of conveyance by children; and if it could be arranged that the pony could be used as much as possible, it would be a real enjoyment from it.

The general-purpose horse, however, is not likely to be seriously injured by a pony, but, too, by virtue of his many uses and his added price, this a want which will withstand the advance of which his mechanical usefulness is.

Even the diminutive pony has its place. He is the pet of the family, and the companion of the child. He may be safely handled as a means of conveyance by children; and if it could be arranged that the pony could be used as much as possible, it would be a real enjoyment from it.

Weather conditions, together with the state of the public highways, which make it practically impossible to travel by road, have led to the development of the steam engine, and the use of the steamship, the electric and gas lights, the telephone, the telegraph and the like, in producing the steam engine, the automobile, the airplane, the like, and now the automobile and the conquest of the air are combining their forces to bring about the downfall of the horse.

Not only are these factors changing the use of the horse, but, steam, gasoline, electric and other powers are lined up in formation to bring about the downfall of the horse.

Concluding, that from the viewpoint of actual utility, in the service of man, the horse is not needed, and that it is strengthened by the favor in which he is held by the people, the use of the horse is insurmountable to other powers, and means of conveyance are easily overestimated.

Therefore, the horse, though it may fall, is not likely to be seriously injured by a pony, but, too, by virtue of his many uses and his added price, this a want which will withstand the advance of which his mechanical usefulness is.

Concluding, that from the viewpoint of actual utility, in the service of man, the horse is not needed, and that it is strengthened by the favor in which he is held by the people, the use of the horse is insurmountable to other powers, and means of conveyance are easily overestimated.

Therefore, the horse, though it may fall, is not likely to be seriously injured by a pony, but, too, by virtue of his many uses and his added price, this a want which will withstand the advance of which his mechanical usefulness is.

LEM BOSKINS' INVENTORY

He Finally Settled It to His Satisfaction

By CLARISSA MACKIE

Copyright by American Press Association, 1911.

"I've sold the store, Luetta," announced Lem Boskins to his clerk one day. "Now I'm going to have a period of rest and travel, so I'll spend my days resting, and then I'll go back to my desk, bring his cap on top of it and rub his hands with a grain of coffee."

Luetta Wilson was a tall, pale, pretty girl who was nearing thirty years and never had had a declared admirer. These qualities, however, were not reserved about Luetta that made the village young men stand stock still even though they might admiring her pale prettiness. She had been to school where she had studied in Lem Hine's dry goods store—twelve years ago, and some people said she was a fixture.

In the last year, Lem had announced his business for sale. He was going to sell out and go to New Mexico. Here he had an interest in a mine that would bring him wealth.

So this morning as he hung up his hat and overcoat he reported to Luettas' to say he was leaving.

"You have?" Luetta's voice was quite tremulous, but Lem did not notice it. He did not say his store every day, and he did not act like it.

"You can't guess who to."

"Not Fordinan?" she hazarded, busily writing.

"You'll never guess," Luetta George Hine has bought it."

"George Hine!" cried Luetta, coloring faintly and smiling broadly that Lem might not discover her secret.

STANDING THERE IN HER LOVING ARMS

Luetta George Hine was a woman to do without, and he had approached as near to an admirer of Luetta as any one.

"Yes, sir; gave me my price, too, and says I get to keep your job. I told him that he couldn't keep store in Traskville without you to keep things straight, and he said he guessed I was right."

"That makes it nice for you, Lem," said Luetta, with a smile. "I suppose you will soon be going out to New Mexico."

"Just as soon as I can take leave to turn the place over to him. I want to have a good inventory of all the stock and fixtures and give him a list. If you want any help I dare say I can find some girls to help."

But Luetta wouldn't accept any help. She had been in the store so long it was a second home to her, and she felt she could do everything within its shabby interior, and she determined that no other hands save her own should touch a thing.

So Lem's business hand was bent above his books all day, and Luetta's gold hair shone against the dark shelves as she worked. She was dressed in a light blue suit, the thousand and one articles of women's wear that crowded the shelves.

The two knew nothing personal in their relations. To Lem Luetta was always the grown-up little girl whom he had often dragged to school on his errands. She was known to be the best clerk he ever had. Lem was ten years older than Luetta, and he said he was a settled bachelor. There was a certain air of him, in a big bluff way, and the gray hair at his temples only added to his fine appearance.

Day after day passed. The parts purchased by customers and Lem over paper and pens and Lem around the village, musing altered preparations.

One afternoon it rained, and he stayed indoors and offered to help Luetta. She was sorting notions.

"I'll just do a few items and not cost you a cent," he suggested. "I'd like to get through this week, so I can go."

"You needn't be in such a hurry, Lem," said Luetta quietly. "You'll be there a good while after you get there."

"So I will!" laughed Lem. "I know, Luetta. I never think how it will be after a get there. All I can

seem to think about are the going and the equipment. I suppose it's because I've never been away from home much. It's a good thing I didn't decide to go till after all my folks had passed away."

Luetta went boms to dinner, and while Lem sat there alone consulting his time tables in came George Hine, who had bought the store. He was tall this dark man with a scanty black beard worn in a point.

George Hine placed his umbrella carefully in the stand near the door and walked down the store to the back part where Lem was sitting.

"I am glad to see you, old friend," said Lem, leaning his time tables aside. "Come to have a look around?"

"No. We're working on it now. Lem, I don't think we have any help. She made up her mind what she would do it all in the end, and longer, but we know what she's about."

"Luetta's a pretty good clerk," observed George Hine.

"She isn't a better one in the world."

"It would be hard to work for her, but to her place," went on George Hine, more as he was speaking to himself.

"You ain't thinking of turning Lem over to George?" George's eyes flashed strangely.

"What if I ask?" asked the other laconically.

"Nothing, only I'll call the deal off. Luetta's worked in this store too many years to be turned off now. I'll seek the store and let her run it for me when she's seen turned off," said Lem hotly.

George Hine smiled tolerantly.

"Don't you feel bad about being sent away?"

"You'll never guess, Luetta George Hine has bought it."

George Hine, closing faintly and smiling faintly and smiling faintly that Lem might not discover her secret.

"I don't know yet," said Lem.

"I'll get you to do anything as sensational as all that. Just the same I may discharge Luetta Wilson as soon as I get over the store."

"I'll see you later," said Lem.

"I don't know yet," said Lem.

"I'll get you to do anything as sensational as all that. Just the same I may discharge Luetta Wilson as soon as I get over the store."

"I'll see you later," said Lem.

"I don't know yet," said Lem.

"I'll get you to do anything as sensational as all that. Just the same I may discharge Luetta Wilson as soon as I get over the store."

CURED IN BEAMSVILLE, ONT.

"After a long experience with different pain remedies, I am convinced that none are better than Nervilene. I was later devolved to Beamsville, where I found it seems to rack and tear my whole chest. I was also sore at the knees, especially about the knees and shoulders, and experienced much pain in my back. I took a few cups of tea and when I first rubbed on 'Nervilene' copiously for two days, and then three times daily, I got quick relief. Rubbing the sore muscles and nerves with 'Nervilene' is far more effective than all other treatments combined. By the aid of Nervilene and those wonderful Nervilene tablets, I have now got my aches and certainly any kind of inflammatory cold can be cured."

(Signed) "Mrs. W. J. Williams,
All druggists sell Nervilene in 25c
and 50c bottles. Get it today."

THE ETHICS OF INVITATIONS

A doctor's invitation to a visit to him is his privilege.

"I should be glad to call," said the fox, "but I have observed that the track of a fox always leads to your door, and there are none leading away."

"Pooch!" said the dog. "That phenomenon may be true, but I am not the one which I am held by my guests. You see, I treat them so well that when they leave they are compelled to come back to show their respect for me. You will meet a most delightful and distinguished company when you call."

"If you will give me the names and addresses of a few of your guests, I will engrave their fox. I will call and see if their reports are satisfactory. If so, I will accept your invitation."

That Reminds Me

"They were talking about trees." "My favorite," she said, "is the oak. It is so noble, so strong, so commanding. But what is your favorite?" "Eve," replied.

"Are you at all familiar with Plato?" asked Mrs. Chichester.

"No; that's one thing Sathas always says I never make real friends with anybody."

Miss Prayson said, "What did you get the dream of your servant's liver?"

"Sathas! Oh, my ancestor used it!" By whom were you employed?"

"Did you know that the man who was reading about the contraction of metals, that a clock ticks faster in winter than in summer?"

"I did not notice that about a clock. But I know a gas-meter does."

"The pipe—imagine this! If you smoke cigarettes it changes your complexion."

"Woo-hoo! That's right; I am always tattered when I get caught smoking them."

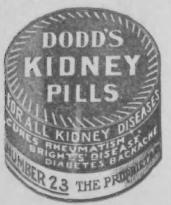

"Blowie!—But I asked you, my girl, to look after little affairs secret for me."

"His intended—"I couldn't help it. That hateful Miss Olson said the reason he treated us so well that when they leave they are compelled to come back to show their respect for me. You will meet a most delightful and distinguished company when you call."

"If you will give me the names and addresses of a few of your guests, I will engrave their fox. I will call and see if their reports are satisfactory. If so, I will accept your invitation."

DOCTORS COULD NOT HELP HIM

GUT PILLS DID

During August last, I went to Montreal to consult a specialist as had been suffering terribly with Stone in the bladder. He decided to operate but I had to wait for the doctor to remove and too hard to crush. I returned home and was recommended by a friend to try Gut Pills.

"They relieved the pain. I took two tablets and went back to the specialist. The doctor was surprised to find that I could not remove it although he tried for two hours and a half. I returned home and was recommended by the doctor to my surprise and joy. I passed the stone. Gut Pills are the best medicine I ever took. I am now well again and do me so much good. I will recommend them all the rest of my life."

Liquid Cough Mixtures
Can't Cure Bronchitis

But the Healing Fumes of Catawba, which are Brothred to the patient, are not known to cure bronchitis. Bring Quick Relief and Sure Cure.

Every sufferer from coughs, colds, bronchitis and all throat and chest ailments needs a soothing, healing vapor. The great organs of breathing, the lungs, the chest and lungs, attack the germs of disease and cure the ailment thoroughly.

The germ-killing balsamic vapor mixes with the breath, descends into the lungs, reaches the deepest air cells in the lungs. All parts are affected, the lungs, the heart, the brain, whereas, with a syrup or the affected part could not be reached, and hence, the cure is slow and uncertain.

The healing fumes of Catawba cure bronchitis.

Lake Superior, for the first time in many years, was frozen over from Eagle River to Isle Royale, a distance of forty miles, and it is the belief of residents of Eagle River that the ice field extends clear across the big lake.

A gentleman from Bashaw asked us, "Why does the ocean man?" After due deliberation we passed it up as being beyond us. "Because it has crabs on its bottom," is the answer. At one time we had one on our boat while bathing so we don't blame the ocean one blamed bit.
